Reliable Electronics Manufacturing

# ABOUT LOGAS

Founded in 1984, Logas Manufacturing Corporation has been meeting the ever changing needs of the electronics assembly community. Specializing in quick-turn assembly of Engineering prototypes and high mix low to mid volume circuit card assembly of throughhole, surface mount and combinations of the two technologies.

In 1995 Logas Manufacturing Corporation received ISO 9002 certification, and has since received its ISO 9001:2000 accreditation.

In 1998 Logas expanded its capabilities to include electromechanical assembly, chassis assembly and now provides full turnkey service to those customers who are looking to completely outsource. Quality, Flexibility, Dependability and Cost. These four words express our vision for all that we do. They are represented in our uncompromising commitment to our customers, our suppliers, and our employees. We deliver superior customer service, set achievable commitments and deliver products which meet/exceed customer requirements.

Logas will continue to grow through additional personnel and capital investment. We are committed to play a valuable role in the fast paced industry where a quality product and quick turnaround is key to our customers success. We will keep pace with the changes in technology to ensure that our customers' needs are taken into account and every piece of equipment we purchase is a value-added service to our customers. Logas strives to foster relationships with its customers and suppliers at all levels to ensure every product we deliver is of the highest quality, a fair price and on time.

## our core capabilities

### ■ CONSUMER ELECTRONICS

- Motherboard for Pc's
- Control Panels for mobile devices
- Panels For Cameras
- Assembly
- Prototype Support
- etc.

### ■ INDUSTRIAL ELECTRONICS

- Power Control Panels
- Mechanic assembly
- Oil and gas control systems
- Rework and RMA support

### ■ CLASS III CMS

- Defense, Aerospace, Medical
- Devices
- Dosimeters panels and assemblies
- Mosfets
- Smart Sensors
- Control Panels

# NPI new product introduction

Time-to-market, concurrent engineering, design for manufacturability and assembly (DFMA), Flexible pricing etc., are key concerns of niche customers who seek to bring their inspirations to life.

Logas takes away these concerns allowing you to focus on what you know and do best-design and sell your products.

Our seasoned personnel are continuously looking for new systems and processes to meet and exceed your expectations.

# Turnkey solutions

With increasing changes in technology and rapid innovation, Logas keep up to date and supports both mature and evolving industries.

## Communications Electronics Manufacturing Services

Logas understands the communications industry. We provide communication electronics manufacturing services for products that will be sold any where in the world

## Vehicle/Transport Electronics Manufacturing Services

Logas has manufactured components for various vehicle/transport systems such as: GPS systems, Vehicle diagnostic and control systems, Brain box panels, etc.

## Medical Electronics Manufacturing Services

Our medical electronics manufacturing services include Leadfree, Turnkey, Asian Sourcing, Design for manufacturing, Prototyping, Supply Chain management etc. These are tailored to low- to mid-volume, high mix.
